

FRONTEND DEVELOPER

Responsibilities:

- Collaborate with website designers and, in some cases, clients to discuss and understand the website vision.
- Evaluate wireframes and website mock-ups provided by product designers.
- Implement frontend code based on specifications and integrate with backend functionality to ensure websites function as intended.
- Utilize built-in development functions from content management systems to enhance website performance.
- Maintain and update websites for long-term clients, making design and content changes as needed.
- Debug frontend issues and report backend bugs to the backend development team.
- Perform additional tasks as assigned by the Product Owner.

Requirements:

- At least 5 years of experience in frontend development.
- Advanced proficiency in **Vue.js** and **React.js**.
- Strong knowledge of **Node.js** for backend integration and server-side JavaScript.
- Expertise in building responsive and accessible web applications.
- Proficiency in modern JavaScript (ES6+), HTML5, and CSS3.
- Experience with version control tools such as Git.
- Familiarity with state management tools (e.g., Vuex, Redux).

- Understanding of RESTful APIs and asynchronous programming.
- Strong problem-solving skills and attention to detail.
- Experience with build tools and task runners (Webpack, Babel, etc.).
- Ability to work effectively in an Agile/Scrum development environment.
- Strong communication skills and ability to collaborate with cross-functional teams.
